Education

Manipal University Jaipur 2023 – 2027
B.Tech. Computer Science & Engineering (IoT & Intelligent Systems) · CGPA: 8.23/10 *Jaipur, India*
Gyan Bharti Residential Complex – *Senior Secondary (CBSE)* 90.6%
Creane Memorial High School – *Secondary (CBSE)* 94.4%

Technical Skills

Backend: Node.js, Express.js, TypeScript, JavaScript (ES6+), FastAPI, REST API design, OpenAPI/Swagger docs, JWT auth
Databases: MySQL, PostgreSQL (schema design, indexing, migrations), MongoDB, SQL (CTEs, window functions)
Frontend: React, Tailwind CSS, shadcn/ui, Vite, HTML5, CSS3, React Native (Expo)
Testing & DevOps: Git, GitHub Actions CI/CD, Docker, Pytest, Sentry, Vercel, Render, Neon
Third-party APIs: Razorpay payments, LLM APIs (Groq / Llama 3.1, Gemini)
Core CS: Data Structures & Algorithms, OOP, DBMS, Computer Networks

Projects

CampusConnect – Campus Event Platform | *FastAPI, PostgreSQL, TypeScript, React, Docker* Live | APK | API | GitHub

- Designed a FastAPI backend with 29 REST endpoints and published API docs for a platform serving 82 MUJ clubs and 3 user roles.
- Designed a 22-table PostgreSQL schema with 40 indexes; moved the live database onto Alembic migrations without losing data.
- Built JWT auth with refresh-token rotation, role-based access, rate limiting and capacity checks; Razorpay payments verified on the server.
- 66 tests (87% coverage), CI/CD, Docker and Sentry; testing caught a production crash, 23 TypeScript errors and an admin-access flaw.
- React + TypeScript web app and a React Native Android app (APK) run on the same API.

Kulfiwala – Food Ordering Platform | *Node.js, Express.js, TypeScript, React, MongoDB* Live | GitHub | 2025

- Built a Node.js/Express backend with 7 REST endpoints (auth, products, orders, reviews, contact) on MongoDB Atlas.
- Built the React (Vite) + TypeScript frontend with JWT-protected routes and a cart-to-order flow; deployed on Vercel and Render.

FlavorLens – Restaurant Expansion Analytics | *SQL, PostgreSQL, Python, Streamlit, Groq API* Live | GitHub | 2025 – 26

- Scored Bangalore localities in SQL (CTEs, window functions); integrated an LLM API that only explains the computed results.

HEATSHIELD – Digital Twin for Heat Strain | *Python, Streamlit, Plotly, NumPy, XGBoost* Live | GitHub | 2026

- Led a team of 2 (Happiest Health Digital Twin Challenge 2026); deployed a heat-risk forecasting dashboard for older patients.

Experience

Freelance Subject Matter Expert Oct 2022 – Oct 2024
iitianacademy.com *Remote*

- Wrote 1,000+ step-by-step solutions to analytical and algorithmic STEM problems in LaTeX, reviewed for accuracy.

Certifications

- Introduction to Software Engineering – IBM
- SQL (Advanced) – HackerRank
- React Basics – Coursera
- Design & Analysis of Algorithms – NPTEL, IIT Madras (Elite)

Achievements

- Dean's List (semester GPA above 9.0) for three consecutive semesters: 9.10, 9.21 and 9.95 (Semesters 3–5).
